

To our partners and stakeholders

None of us would have predicted the socio-economic impact of coronavirus across the world. To ease navigation through this difficult period, in both businesses and in our personal lives;

- We are proactively guiding our employees and stakeholders on precautionary measures as per the government's recommendations.
- We have developed and shared Standard Operating Procedures for the workplace. These provide processes to follow in case of a confirmed case within manufacturers' premises.
- We are amplifying the nation-wide hygiene campaign and the need for the public to practice sanitary procedures in public and private spaces.
- We are mobilising members to augment the hygiene campaign and supply essential products needed for its success.
- We are working round the clock to ensure citizens have access to essential goods. We have provided a [live database](#) of locally manufactured finished goods.
- We are working with producers, distributors and retailers to ensure that the rule of law is upheld and that commodities in the market retain current prices or lower the price for the sake of the consumer.
- We are working as a support system for frontline personnel in counties by providing water storage tanks, alcohol-based sanitizers and soaps.
- We are raising awareness towards flattening the curve, in partnership with members of the National Business Compact on COVID - 19.
