

Prequalification for Consultancy Services to undertake Environmental Compliance Training for Kenya Association Of Manufacturers

ANNEX I Terms of Reference for consultancy services to undertake Environmental compliance training.

1. Background

Kenya Association of Manufacturers (KAM) is the voice of Kenyan industry with a membership of about 1000 members within the manufacturing and value add industries. KAM works towards the realization of the best business environment for industry in Kenya in order to improve their competitiveness.

The association in collaboration with the Ministry of Energy established the Centre for Energy Efficiency and Conservation (CEEC) in 2006 that has been working to assist industry on energy efficiency and conservation.

KAM through the newly formed Centre for Green Growth and Climate Change (CGGCC) is expanding its training scope for its members to include training on Environmental Compliance in line with the local regulatory requirements and in line with the ultimate goal of sustainable manufacturing.

KAM having identified the compliance knowledge gap; this necessitated the need to intervene and ensure that the industry is kept abreast of not only the legal requirement but also the technologies available to meet the compliance levels required.

This need was further propelled by recent events where manufacturers have found themselves on the receiving end of the law with abrupt shutdowns by National Environmental Authority due to lack or low compliance levels.

Objective of the assignment:

- I. To provide manufacturers with indepth training on best practices in environmental compliance requirements in industry as per the established regulations, train them on; existing technologies, implication of non-compliance and benefits of compliance to industry including cost advantage of compliance
