

Vacancy Announcement

The Kenya Association of Manufacturers (KAM) is a membership organization representing over 750 leading manufacturing and value-add companies in Kenya. We are seeking to competitively fill the following vacant position:-

Category: Projects Management
Designation: Manager – Centre for Green Growth and Climate Change (CGGCC)
Reporting to: Head of KAM Consulting **Section:** Energy Services
Contract Type: 3 Years Contract Renewable Subject to funding
Location: KAM Head Office at Nairobi

Job Purpose: To manage and coordinate the implementation of the Centre for Green Growth & Climate Change strategy, support the commercialization concept within the centre as well as across KAM to ensure success, sustainability and delivery of profitable green growth services

Key Objectives

- Oversight implementation of the CGGCC strategy at KAM;
- Actualization of commercialization agenda to increase revenue and profitability of KAM Consulting through the CGGCC initiatives
- Attract and sign donors as well as firms to expand member services and scope
- Improved data management held by KAM towards supporting members towards green transition and sustainability

Duties and Responsibilities

Specific duties and responsibilities include, but not limited to the following:-

- Perform coordination and supervisory functions to the CGGCC section initiatives at KAM Consulting for the benefit of the industry and other target sectors;
- Put in place an implementation plan for the KAM Green Growth Strategy in consultation with the management and relevant committee and ensure key milestones are achieved in time as per the workplan;
- Review the marketing strategy for CGGCC product portfolio and pricing model for the same to have a clear financial forecast of the revenue to be generated and manage the marketing of centre services to ensure achievement of set targets;
- Provide KAM members with green growth firm level services leaning towards best practices in terms of; Capacity Development, Technology development and transfer, process optimization, resource efficiency and green investment linkages;
- Coordinate Energy audits, Water audits and Energy Efficiency trainings conducted at CEEC by managing consultants and reviewing the quality of consultants reports for approval by the Head of KAM Consulting;
- Link bankable green projects at a reasonable facilitation fee with financial partners and develop a strong investment ready pipeline of projects;

- Support KAM Consulting Unit Head in development and commercialization of new products to increase revenue streams and profitability of CGGCC;
- Develop a pipeline of green funds and develop concepts/proposals to attract funding partnerships to sustain the centre initiatives for the benefit of KAM members;
- Coordinate the CGGCC advocacy, consulting, and management services initiatives to ensure enterprises adopt green growth practices in their operations;
- Supervise the provision of technical advice on issues related to firm level energy efficiency and other resources management including water/waste water and raw materials utilization;
- Coordinate resource efficiency related studies and analytical documentation of the study results;
- Advise and Lobby for the provision of affordable and reliable electricity for industrial consumers in liaison with the Association of Large Electricity Consumers (AOLEC) and Energy Committee to ensure concerns of the greater KAM membership are represented to the Government;
- Supervise the organization and facilitation of meetings with relevant committees/councils and ensure follow up of agreed actions;
- Assist industry to link up with Energy service providers to facilitate energy audits and support implementation of renewable energy and energy efficiency projects in their facilities.
- Provide guidance to direct reports, monitor and review their work plans and performance;
- Prepare all necessary documentation and progress reports for CEEC as necessary or as required by the immediate supervisor;
- Perform any other duty as may be assigned by the Chief Executive.

Person specifications.

- Bachelor's degree in Business Management or related field, a master degree is an added advantage
- Technical experience in energy matters is a requirement;
- Excellent experience in project management
- Over Eight (8) years experience, 5 of which should be in management level positions in a busy and comparable work environment of energy, service of manufacturing sector orientation;
- Excellent interpersonal, people and communication skills both oral and written;
